## EXPERIENCES / PROJECTS

### Web Developer – ACM Academic Journal Website

2025

*Techno Sky Publications | PHP, JavaScript, HTML, CSS*

- Built the full-stack academic publishing platform using PHP (backend logic, database operations, user sessions) and JavaScript (dynamic UI, AJAX-based forms, interactivity). [\[Link\]](#)
- Developed modular templates for consistent content display across sections: issues, articles, author/editor/reviewer dashboards, news, and policies.
- Implemented a manuscript submission and peer-review workflow, with role-based access (author, reviewer, editor) and process automation (single-blind review, decision flowchart).
- Integrated iThenticate plagiarism-check API to automatically screen submissions for originality.
- Used CrossRef DOI membership to assign and display globally unique DOIs for every paper.

### Pomodoro Timer Web Application

2024

*Technologies Used: Python, JavaScript, HTML, CSS*

- Developed a web-based Pomodoro timer web-app for to improve my own study sessions .
- Features include customizable session and break lengths, and a sleek modern user interface.
- Integrated a notification system for break reminders, a live progress bar and a sidebar for all customization options.
- Link: [\[https://github.com/MubashshirK/pomodoro\]](https://github.com/MubashshirK/pomodoro).
